

Follow 4 Be Safe™

Little Angel's Prints is a complete program to help keep children safe by educating them, their parents and the community about predators that prey on our children. **Follow 4 Be Safe™** teaches children at their age level about child abuse, sexual predators and computer crimes against children by giving them warning signs and safety ideas designed to help them as they grow.

The program is designed to teach parents about behavioral cues of abuse, the laws, and about how to talk with their children. Parents will be given the opportunity to have their child fingerprinted and will be given identification cards for the extra sense of security in knowing they have done everything possible to keep their little angels safe.

We invite you to join us in protecting these little angels by becoming a sponsor to show your support.
